CLC User Group Program Notes Disclaimer
These notes identify CLC Master Plan programming as heard and documented by the Master Plan Programming Team at Holabird & Root LLC. They are by nature interpretive and do not represent any direct quotes or opinions by any of the interviewees or user groups.

Date of Meeting
October 02, 2019

Committee Participants
- Joanne Adamopoulos
- Harry Bekiaris
- Dan Briscoe
- Paul Davies
- Barbara Dickson
- Dorothy McCarty
- Tom Guenther
- Bryan Hadley
- Scott Hardy
- John Lawson
- Frank Lesnak
- Eric Risinger
- Johnette Van Dien
- Dennis Vovos
- Mike Welch

Questions
Participants were asked to respond to the following questions. Responses are encapsulated below each question.

Q1 What makes CLC CLC?
  - CLC is a great place to start a college career.
  - CLC accepts students from any background.

Q2 What is essential to the college that must remain the same?
  - Camera surveillance system is good, though it conveys video only:
    - Virtually no car burglary.
    - Little to no petty crime.
    - Makes work of police easier.
    - Has been implemented on all campuses.

Q3 What aspect(s) of the college must change to move CLC toward its goals?
  - ID’s optional for staff and students
  - Don’t need to treat high school or stem students separately

Q4 How can CLC be more welcoming and inclusionary?
  - Provide wayfinding signage to assist in locating the police departments on Grayslake and Southlake campuses.
• Update evacuation indicators with AED, evacuation, emergency, egress; signs plus plans.

Q5 What role do you see your department / focus area playing in the future? How does your future role differ from your departmental / focus area role today?
• Police can serve as a community liaison.

Q6 What facility / space needs does your department have now and what might your department need in the future?
• Grayslake:
  - Parking lots:
    ▪ Signage should be triangulated for visibility from multiple angles.
    ▪ Add a sign indicating ‘Campus Police’ on the exterior of the Police building and backlight it for night-time visibility.
  - Make trails more prominent, maneuverability, maintenance, surface for access:
    ▪ UTV
    ▪ Provide 2-3 call boxes on each side and periodic lighting on trails.
• Southlake:
  - One or two call boxes are needed in the parking lot.
• Lakeshore:
  - Provide a call box in the courtyard or on the exterior of the police station (or both); coordinate with central command when officers are on patrol.
  - Add speed bumps in the parking garage.
  - Provide a Training Room with a gun range for 3 or 4 stations. Police currently spend $6000 to $8000 per year to rent spaces off-site and pay overtime to officers for training. This is a drain on manpower and resources. Providing a range could offer some potential to generate revenue and serve the wider Lake County community through rental to other groups when not in use by CLC police.
  - Provide a carport / cover associated with squad cars outside police building at Grayslake.
    - Carport for 2 spaces at lakeshore
    - Add more dedicated parking for stakeholders (police vehicles) and visitors at Lakeshore. There are currently only 2 spaces, but up to 10 are needed. (2 squad, 2-4 police only / employees, 2+ visitors)

Q7 What maintenance and sustainability components should be considered beyond the Sustainability Plan?
• Upgrade lighting to high-efficiency LED throughout all areas of all campuses.

Q8 What role do you need technology to play at CLC and what kinds of technology do you need now and in the future?
• Surveillance cameras need to be in domes and not intrusive/non-descriptive, so students and faculty don’t feel crime is an issue.
• Add Interior and exterior cameras for full coverage at all campuses.
  - Currently most classrooms do not have cameras.
  - Fab lab / high tech classrooms currently have cameras for safety, but these are the only classrooms with cameras for safety of students and community.
• Provide tablets in police cars with connectivity / access to cameras.
• Add Knox boxes and provide maps of buildings inside Knox boxes.
The existing graphical user interface system at the police headquarters at Grayslake provides an easy button to lock exterior doors on all three campuses is intended to allow the controller to influence door locks of all classrooms, though this has not been completely implemented. Remote control for all spaces is desired.

Q9 What tools, spaces, technology, support, etc. do you need to facilitate more or better interaction and collaboration with students, faculty, staff, and administration in the future?

- At the Lakeshore Campus:
  - Substation needs to be refurbished, including finishes – paint, carpet, flooring. Bathrooms is currently in process.
  - Cameras operable
  - Camera plan to be implemented, awaiting server room.
  - Cameras in parking garage to be implemented
  - Separated college buildings present a challenge for police.

- At the Southlake Campus:
  - Improve presence of police.
  - Cameras will be added to parking lots with upgrades to technology.
  - Cameras will be added to elevators.

- Work tickets are obtained from Facilities.

Q10 How do you interact with the other campuses now? How do you want to interact with these CLC locations in the future?

- Supervisors drive to each campus, which can take 4 hours round trip. Other members are assigned to each campus and report to those campuses daily.
- Campus watch meetings at all campuses

Q11 How do you interact with the Lake County community and workforce now? How do you want to interact with these groups in the future?

- Meet with run hide fight, women’s defense, specific space defense, codewords where needed, regular discussions with staff.
  - Need to create dedicated places for training.
  - Police to serve as a community liaison.
- Collaborate without outside state police for recent events; hard to do with classes in session

Other Discussion:
